LATER ENGLISH NEWS.

EXPORT MARKET.

Since the late arrivals, which have in a great measure countermanded the orders to purchase wools on English account, the demand has very much fallen off, and sales are only effected at a decline of two-pence per paund on previous rates, the large quantities that are now in Sydney for sale, but held for higher prices if forced into the market, will probably create a further decline. From the latest accounts there does not appear any reason for so great a depreciation in price, the market looking up for the winter demand in England, and the harvest very plentiful. Large failures have taken place, but these not much connected with the wool trade, while the manufacturers have not a large stock to make them feel the pressure, and they will now only purchase those lots which are classed, owing to the great difficulty of reselling the qualities that are not adapted for their manufactories, and all parties only purchasing from hand to mouth.

Nothing is doing in tallow. English news to September 24th had arrived at Hobart Town via Singapore, but we do not observe any extracts of later date than we have already given. On the 24th the Money Market was said to be more tranquil, and there had been no report of additional failures. Consols were \$53 to 86; and 863 for the account
